

Continuous Exposure Management

Continuously assess your cyber exposure in financial terms, drive mitigation based on attack route exploitability, and develop your cybersecurity maturity.

Trusted by industry leaders around the globe

The Benefits of Working with CYE

96%

of customers' business-critical attack routes are blocked within six months.

88%

reduction in remediation time following a cyber incident.

87%

of customers improve ROI on their security budget.

CYE's acquisition of Solvo enables businesses to continuously strengthen their cloud security posture, mitigate risk, and safeguard assets across hybrid and multi-cloud environments.

What we experience with CYE is a growing maturity and understanding of what is necessary to protect our operations, in both the IT and the OT environments of the company, from the top management down to the individual specialists and engineers doing the work.

Ulrich Fässler, CEO & Chairman

Meet Hyver

Hyver quantifies enterprises' exposure in financial terms, visualizes the most exploitable attack routes to their critical business assets, creates optimal mitigation plans tailored to each business, and improves cybersecurity maturity.

With Hyver, you can:

- ✓ **Gain** clarity on the financial impact of a breach that can affect your reputation and business continuity, including the cost of IP loss and PII of your customers and employees.
- ✓ **Generate** reports for the board that focus on organizational risk exposure, your cybersecurity program, and how you compare to industry peers.
- ✓ **Determine** the chokepoints in your attack surface by considering the threats that are most likely to be exploited.
- ✓ **Tailor** your mitigation strategy and operational remediation plans to your organization, along with required resources and team effort.

Hyver not only fortifies our defenses and identifies the true threats to our company, but its cyber risk quantification capabilities have transformed our approach to cyber exposure management.

Holger Schleicher, CISO

Meet Our Cyber Experts

CYE combines its cutting-edge technology with dedicated professional guidance and services provided by world-class cybersecurity experts, including:

- ✓ **Organizational Assessment:** Assess your security controls, uncover vulnerabilities and misconfigurations, and strengthen your cyber posture.
- ✓ **Strategic & Advisory:** Receive tailored strategies for protecting your organization, comply with regulations, and be prepared for a cyber incident.
- ✓ **Emergency & Operations:** Get 24/7 support for successful containment, remediation, and recovery from a breach, while minimizing operational impact.

About CYE

CYE's exposure management platform, Hyver, transforms the way security teams protect their organizations. With CRQ at its core, the platform reveals enterprises' exposure in financial terms, visualizes the most exploitable attack routes to critical business assets, and creates mitigation plans tailored to each business. CYE's customized reporting enables the sharing of vital board-level metrics and validating exposure reduction over time. In addition, CYE improves cybersecurity maturity by mapping weaknesses and defining targets based on industry frameworks. Founded in 2012 in Israel with operations around the world, CYE has served hundreds of organizations across industries globally. Visit us at cyesec.com.
