

Meet Hyver, the **Optimized** Cyber Risk Quantification Platform

Using AI, machine learning, and innovative technology, Hyver visualizes attack routes, quantifies, mitigates, and communicates cyber risk, and matures organizational cybersecurity posture.

Attack Route Visualization

Hyver maps possible attack routes to your business assets across all environments. It delivers a complete, visual view of your organizational security posture.

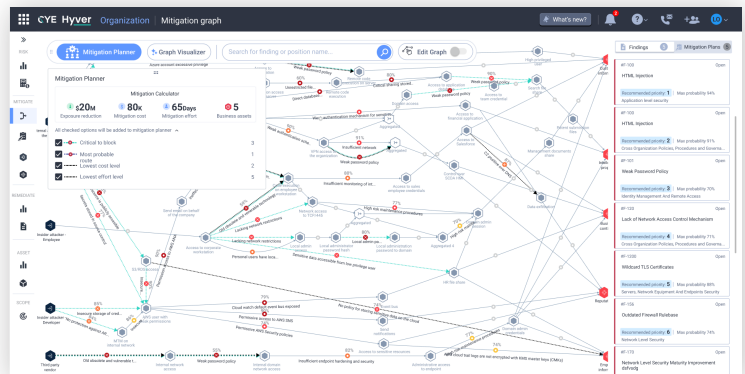

Cyber Risk Quantification

By correlating asset value, the likelihood of attack, threat actor activity, and financial data, Hyver provides a dollar value of the cost of a breach compared to the cost of remediation.

Risk Mitigation Planning

Hyver provides a mitigation plan with clear prioritization according to business KPIs like security maturity and financial impact. That way, you can easily understand your security gaps and how to close them.

Hyver Benefits

- **Easy Deployment:**
Effortless implementation without agents streamlines deployment and reduces operational complexity.
- **Full Customization:**
Features, workflows, and integrations are tailored to your organization's specific needs.
- **Predictive Data:**
Reliable information ensures informed decision-making to enable proactive cyber risk management.
- **Immediate ROI:**
Benefits include enhanced operational efficiency, reduced costs, and improved security posture.

Expert Services

Improve your organization's security with CYE's experts combined with Hyver's technology.

- **Organizational Assessment:** includes comprehensive evaluations, red and purple team operations, and penetration testing.
- **Strategic & Advisory:** includes management IR readiness, cybersecurity due diligence, and CISO as-a-service.
- **Emergency & Operations:** includes crisis management, incident response, and cyber threat hunting.

“Hyver not only fortifies our defenses and identifies the true threats to our company, but its cyber risk quantification capabilities have transformed our approach to cyber risk management.”

Holger Schleicher,
CISO
