

# { Cloud } Solvo

## Cloud Security Posture Management

Empower your team to proactively identify and prioritize cloud risks, fostering alignment and collaboration among security, DevOps, and engineering.

### The Solvo Solution

#### From Our Customers

“From a security perspective, Solvo improves the relationships between developers and security teams, helping them work together and be more productive.”

**Daniel Neto, CISO @ Ame Digital**

“Solvo empowers our team to concentrate on strategic objectives, by providing its seamless synchronization of security and operational requirements.”

**Eyal Zukovsky, CEO @ Kumba**

“With Solvo, a compliance audit is no longer a reason to worry about how long it will last or how difficult it will be.”

**Hilik Paz, CTO @Stoke**

#### Did You Know?

**75%** of security failures are the result of inadequate IAM configuration

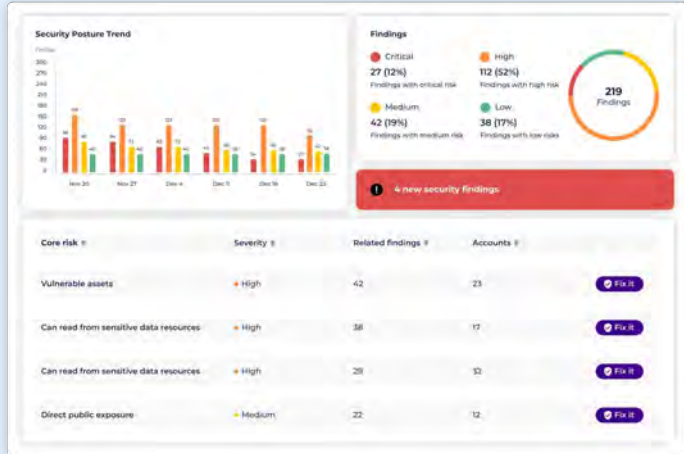

**95%** of cloud breaches happen due to a human error

Solvo reduces excessive permissions by **85%**

and improves TTSP (time to secured production) by up to **42%**

## Master Your Security Posture

Empower your team to proactively manage and strengthen your cloud defenses with Solvo's robust Security Posture Management capabilities. We provide the tools to gain deep visibility into your entire cloud environment, understand your risk exposure, and take decisive action to minimize vulnerabilities.

### ✓ Complete Cloud Inventory

See every cloud resource, its entitlements, and the risks they pose to themselves and others.

### ✓ Risk Prioritization

Reduce alert fatigue and focus security teams on the most critical risks with intelligent prioritization.

### ✓ Vulnerability Detection

Proactively identify misconfigurations, excessive permissions, and other security weaknesses across your cloud infrastructure.

### ✓ Continuous Monitoring

Maintain real-time awareness of your security posture with continuous monitoring and drift detection.

## Stay Ahead of Compliance Challenges

Solvo streamlines compliance management, helping you meet regulatory requirements and industry best practices with confidence.

### ✓ Real-Time Compliance Monitoring

Continuously oversee cloud resources and promptly identify and address compliance deviations.

### ✓ Framework Support

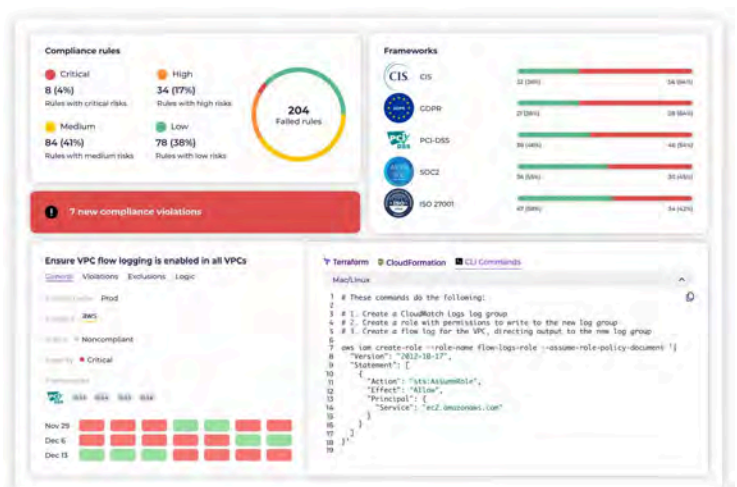

Ensure compliance with industry-standard regulations and benchmarks like SOC2, GDPR, HIPAA, PCI etc. and establish your unique security guardrails.

### ✓ Prioritized Compliance Focus

Streamline your compliance efforts by focusing on high-priority violations.

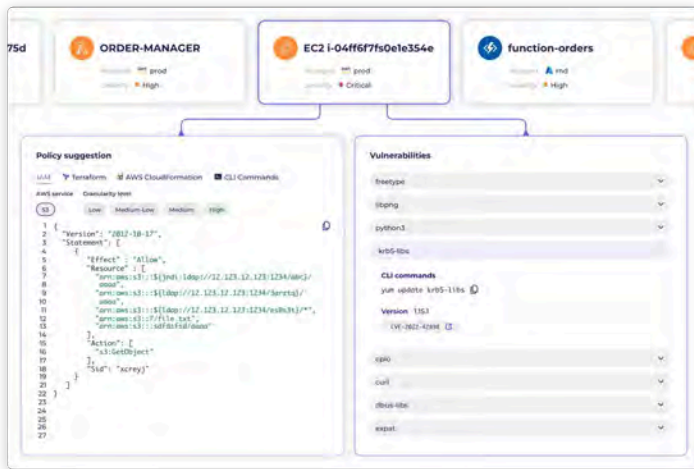

### ✓ Actionable Reporting

Generate comprehensive reports for informed decision-making and confident communication with stakeholders.

## Automated Remediation Tailored to Your Environment

Solvo's auto-remediation capabilities enable you to address security risks quickly and efficiently, minimizing the impact of potential threats.

- ✓ **Automated Remediation**  
Automatically remediate security misconfigurations and vulnerabilities to reduce your attack surface.
- ✓ **Contextual Remediation**  
Tailor remediation strategies for network security, IAM, infrastructure, and data protection, ensuring continuous detection and resolution without operational disruptions.
- ✓ **CI/CD Integration**  
Automate security remediation with code fixes through the CI/CD pipeline.
- ✓ **Accelerated Remediation**  
Achieve rapid results with readily deployable remediation solutions.

## Discovery and Detection

Master cloud asset management to accelerate your path to production, proactively tackle vulnerabilities, and continuously monitor and maintain your cloud resources to meet configuration standards. By staying one step ahead of potential issues, you can guard your cloud with confidence.

- ✓ **Gain Control of Your Inventory**  
See every cloud resource and its entitlements, and eliminate the risks they impose on themselves and others.
- ✓ **Accelerate to Production**  
Automate security remediation with code fixes through the CI/CD pipeline.
- ✓ **Prioritize Your Risks**  
Reduce alert fatigue and focus security teams on the most critical risks.

## About CYE

CYE's exposure management platform, Hyter, transforms the way security teams protect their organizations. With CRQ at its core, the platform reveals enterprises' exposure in financial terms, visualizes the most exploitable attack routes to critical business assets, and creates mitigation plans tailored to each business. CYE's customized reporting enables the sharing of vital board-level metrics and validating exposure reduction over time. In addition, CYE improves cybersecurity maturity by mapping weaknesses and defining targets based on industry frameworks. Founded in 2012 in Israel with operations around the world, CYE has served hundreds of organizations across industries globally. Visit us at [cyeseccom.com](https://www.cyeseccom.com).
